

# Providing 'Peace of Mind' to the elderly and their families

Tracking Central's Care Tracker SOS-Voice & Care Tracker Watch, are personal alert devices with GPS location and 2-way voice capability.

Unlike other SOS-alert devices that only work around the home these use mobile phone technology which means it will work "anywhere" regardless of how far the wearer is from their home.

**The Care Tracker SOS-Voice & Care Tracker Watch are the ideal "alert & location solution" for the:**

- Elderly in isolated situations wanting greater independence, anyone suffering from disorientation and who wanders.

Elderly wearing either device can place an emergency SOS voice call to a pre defined number simply by pressing the SOS button. Pressing the SOS button will also record the exact location of the wearer each time the button is pressed.

- Families and carers who seek comfort in knowing that loved ones can be readily located at all times.

Family members or carers are able to call the either the Care Tracker SOS-Voice or Care Tracker Watch, and speak directly to the person wearing either device.

## Care Tracker SOS-Voice:

- Is not much larger than a match box.
- Can be worn like a pendant or in a pocket or carried in a bag.
- Operates using a rechargeable internal battery which has a standby time of up to 7 days.
- Can be accurately located within 10 meters of any location globally.

## Care Tracker Watch:

In addition to being a fully functional watch it also has all the same features as the CareTracker SOS-Voice with the additional benefit of being able to lock the watch onto the wearers wrist (using the optional magnetic locking device)

## Locating the Care Tracker SOS-Voice or Care Tracker Watch:

- Send an SMS message to either device and it will reply with its current location.
- Use the free iPhone App that will allow you to view the locations in seconds.
- Log onto our Live Tracking Portal via your computer.

## Monitoring Fees:

A small monthly monitoring fee will be charged

*Read Pauline's Care Tracker Story on reverse side*

# It will have you “grinning from ear to ear”

Pauline is a 60-year-old woman who now suffers from the condition aphasia after recently suffering a stroke. She enjoyed keeping fit until one day she became disorientated on one of her lengthy walks.

After Pauline's traumatic ordeal of being lost for eight and a half hours, dehydrated and stressed, she thought all hope for a normal life was shattered – until Brisbane-based company, Tracking Central, stepped in to assist.

Pauline, one of Tracking Central's many clients, now uses the Care Tracker, a personal GPS locator which uses the same technology as a mobile phone.

“She was grinning from ear to ear when she received the Care Tracker,” Tracking Central's director, Claude Raiola told DPS Publishing. “Pauline knew the device would give her the freedom to do whatever she wanted,” Mr Raiola said.

Using a mobile phone, people simply have to call the Care Tracker. You will then receive an SMS reply providing details of its current location, including a clear street map as to where the Care Tracker is located.

The Care Tracker is ideal for the elderly who are in isolated situations wanting greater independence, as well as to families and carers who seek comfort in knowing loved ones can be readily located at all times.

The device can be worn like a pendant or carried in a bag as it is not much larger than a match box.

It operates using a rechargeable internal battery which has a standby time of up to 7 days.

Clients will be required to subscribe to the “live on line tracking portal” at a small monthly subscription fee.

**For more information on the Care Tracker or other Tracking Central products, contact the team on 1300 255 990 or visit [www.TrackingCentral.com.au](http://www.TrackingCentral.com.au)**
